

The Local Hospice Difference

It's easy to assume that all hospice services are the same, but they're not. CHP Home Care & Hospice is one of the region's most trusted and established providers. Our staff shares a genuine passion for helping people. *Compassion and caring are who we are. Our priority is our patients!*

7 Reasons Why We're Different

Here - Our staff is local and live right here in our communities, so we know the people and resources available within our communities.

On-Call - CHP specializes in true 24/7 on-call care support. We are there when you need us regardless of the time of day or day of the week. Pain and symptom control needs can happen at any time. We will be there.

Same Day Response - Through our longstanding relationship with local DME providers, our nurses coordinate medication and equipment deliveries to your door the same day ordered, even after hours.

Personal Service - We take same-day referrals for hospice admissions, delivering a personalized plan of care to meet both patient and family needs.

Innovative - Available massage therapy, music ministries, physical therapy, aide services, or speech therapy lend extra support to patient and family.

Collaborative - Our clinicians are hospice professionals working as part of a caring, interdisciplinary team (nurses, physicians, social workers, clergy); which helps us provide a confident plan of care for your loved one.

Effective - CHP nurses communicate closely with physicians to determine the best medications and pain-control measures for each patient. We pride ourselves in keeping families informed and patients comfortable.
